Model **TGAES** hydrocarbon gas detector is an open path gas detection system that provides continuous monitoring of combustible hydrocarbon gas concentrations in the range of 0 to 5 LEL/m, over a distance of 15 to 650 feet (5 to 200 meters). Standard system outputs include 4-20mA, HART and RS-485 Modbus RTU serial communication. **TGAES** is capable of detecting most hydrocarbon gases and vapors including methane, propane, butane, propylene and others. No direct electrical connection between the two modules is required. In some applications, one **TGAES** detection system can provide protection equivalent to as many as eight point detectors.

The **TGAES** transmitter module illuminates a direct linear path ending at the **TGAES** receiver module. As flammable hydrocarbon gases intersect the light beam between the two modules, certain IR wavelengths are absorbed by the gas, while other IR wavelengths are not. A pair of optical detectors and associated electronics located in the receiver module measures the absorption for both the active wavelength and reference wavelength. The ratio of absorption between the active and reference wavelengths determines the amount of gas intersecting the beam along its entire length. A microprocessor computes the gas concentration and converts the value into a 4-20mA signal and MODBUS register value.

### THE LONGEST DETECTION RANGE

Monitors a path distance of up to 650ft (200m).

### OPERATES IN ANY OUTDOOR CONDITIONS

TGAES distinguishes hydrocarbon gas even when obscured by rain, fog, dust, snow or blowing sand

### EASY ALIGNMENT

Use HART communicator or software via RS485 for the fine alignment.

### 3 YEARS WARRANTY

Long reliable product life, low cost to operate over time

## Features and Benefits

- Detects methane and most common hydrocarbon gases including ethane, propane, butane and propylene with equal sensitivity
- Detection range of up to 200m
- T90 less than 3 seconds
- Corrosion-resistant 316 stainless steel enclosures
- Widest operating temperature range: -40°F to +140°F, (-40°C to +60°C)
- Ultra-reliable xenon flash-lamp
- Tri-color status LED or 96 character LCD for full graphical indication w/ Vector
- Source analog 4-20mA, standard RS-485 communication channel under protocol Modbus RTU and relay outputs
- HART communication
- Primary heater protects optics from ice and secondary heater protects the internal electronics
- Able to operate even when obscured by fog, rain, dust, snow, or blowing sand.
- Automatic temperature compensation
- Expected life > 10 years

## Applications

- Tank ships and other vessels
- Refineries, bulk terminals, tank farms
- LNG/LPG processing and storage
- Chemical, paint and fertilizer plants
- Power plants and gas turbines
- Transportation facilities

(\*\*) adapters and plugs are available in nickel plated brass and stainless steel

**Spare Part:**

- P/N 100-0024-01 TGAES Open Path Gas Detector Transmitter - Stainless Steel housing; Includes protective visor, mounting bracket and stainless-steel mounting hardware
- P/N 100-0025-01 TGAES Open Path Gas Detector Receiver Propane - Stainless Steel housing; Includes protective visor, mounting bracket and stainless-steel mounting hardware
- P/N 100-0025-02 TGAES Open Path Gas Detector Receiver Methane - Stainless Steel housing; Includes protective visor, mounting bracket and stainless-steel mounting hardware
- P/N 125-0006 TGAES Protective Visor
- P/N 125-0017 Aperture is used to properly set the signal for the TGAES Open Path gas detector; 1 kit of 5 disc sizes per Detector
- P/N 540-0xxx O-Ring, TGAES Weather Cap Rear Seal
- P/N 125-0021 Mounting Hardware Kit (8 screws)
- P/N 120-0084 TGAES Mounting Plate SS316

**Tools:**

- P/N 120-0078 Hex L-Key. With Standard Tip, 10 mm Size, 4-11/16" Overall Length.
- P/N 120-0076 Magnetic wand
- P/N 120-0058 Calibration filter PT-1
- P/N 120-0057 Calibration filter PT-2
- P/N 120-0056 Calibration filter PT-3
- P/N 260-0009 Cable Assembly, HART Communicator
